## Introduction

The PingFederate X.509 Certificate IdP Integration Kit provides an Identity Provider (IdP) Adapter for PingFederate. This Adapter allows a PingFederate IdP server to perform client X.509 certificate authentication for single sign-on (SSO) to Service Provider (SP) applications.

The X.509 Certificate IdP Adapter uses the PingFederate security infrastructure for certificate validation and management. PingFederate validates the trust of all certificates. A certificate is trusted if the root certificate of the issuing Certificate Authority (CA) is imported into the PingFederate trusted certificate store.

## Change List by Version

### **X.509 Certificate IdP Integration Kit 1.0 (Current) - September 2008**

Initial Release

## Notes

For installation and setup information, see the *User Guide* in the `docs` directory of this distribution.
