

RazorGator Partners with Ping Identity to Offer Secure Internet Single Sign-On

“Ping’ Identity’s technology is outstanding. Their solution allows our corporate customers to easily access their ticket management software application in a reliable and simple manner.”

John Wallace
General Manager, TicketOS

Challenge

To offer its corporate customers seamless access to TicketOS, RazorGator wanted an Internet SSO solution that offered great support, could handle all of the major protocols (WS federation, SAML 1.x, 2.0) and handle any POST and Artifact bindings that customers require to integrate with TicketOS. The ability to support SSO to multiple client-facing Websites and function in a load balanced environment were also critical requirements.

Solution – Ping SaaS Partner Program

- “Fantastic Support”
- An easy, proven Internet SSO connection option for TicketOS customers.
- Easy to configure and maintain - supports all major protocols
- Scales with the needs of the business

Results

Six months into joining the program, TicketOS has leveraged PingFederate and Ping Identity’s SaaS Partner Program to provide Internet SSO capability to their Fortune 500 customers.

About RazorGator TicketOS: RazorGator is the leader in Hard-to-Get® tickets for sports and entertainment events worldwide. Its TicketOS business unit is the worldwide leader in on-demand sports and event ticket management software and services. TicketOS enables organizations to control costs enterprise-wide by automating the processes that normally do manually on paper and spreadsheets.
