

Truist Partners with Ping Identity to Offer Secure Internet Single Sign-On

“We are now positioned to rapidly integrate with all of the popular SSO providers and standards used by our clients. We implemented our second client on the platform in a single afternoon.

Neal Griffin
Executive Vice President, Technology, Truist

Challenge

To support its corporate customers with secure password-free access to its suite of volunteer and fundraising technology tools, Truist needed an Internet SSO solution with broad support for open standards and commercial implementations of SSO.

Solution – PingFederate

- Proven Internet SSO that can support any Truist client
- Quick and cost-effective to implement – improving the customer experience
- Easier access to Truist’s philanthropy tools – increasing employee participation in corporate philanthropy campaigns supported by Truist

Results

PingFederate and Ping Identity’s SaaS Partner Program have improved the user experience for Truist clients. End-users have password-free access to all Truist products. Potential phishing attacks have been minimized for improved security.

About Truist: The leading provider of global philanthropy solutions, Truist was formed in July 2008 by the merger of CreateHope and United eWay. Truist offers a complete portfolio of solutions supportive of global employee and community-involvement program administration. Truist delivers innovative technology and services to more than 1,000 customers across more than 50 countries, representing a cumulative 3,000 programs, 1 million volunteers and \$2.5 billion in charitable contributions.
