

Professional Services Advisory Architecture & Design

The key to a great implementation is a solid design, and our architecture and design service will get you started on the right path with your new Ping Identity product. Used either as a standalone package or in conjunction with other professional services advisory offerings, our architects and consultants will work with your team to understand your requirements and arrive at an overall solution design.

Complete with a documented Architecture & Design Plan and Test Plan, this engagement will help ensure your Ping solution is designed according to our best practices.

You'll rest easier knowing you're supported by experts who can help you:

- Create a design based on your business objectives and our best practices
- Document recommendations to provide future guidance
- Build and strengthen your team's knowledge

WHAT'S INCLUDED?

OVERVIEW	<ul style="list-style-type: none">• We will kick off your architecture and design engagement with an on-site workshop to capture your detailed use cases and requirements.• The workshop is followed by close collaboration with your team to arrive at an agreed-upon architecture and design. This will become the blueprint for your implementation of an initial target set of applications and a testing plan to help validate your new solution.
OTHER ADVISORY OFFERINGS	<ul style="list-style-type: none">• Professional Services Expert Guidance• Go Live Readiness Assessment• Launch Assistance <p>Please contact your Ping representative below for more information.</p>
